

Prime Smart Flags — visibility nearly doubled this month

A plain-English summary of the SEO, local and technical work done this month and the movement it produced in Google Search. Every figure below is pulled live from your own Search Console, with before and after shown side by side.

Client: **Prime Smart Flags, Dubai** Period: **Aug 2026** (28-day window)

Report date: **28 Aug 2026**

EXECUTIVE SUMMARY

The month in four numbers

Comparing the last 28 days (30 July–26 August) with the previous 28 days (2–29 July). Percentages are large but the base numbers are still small and early, so the raw figures are shown next to each one.

IMPRESSIONS

1,110

from **601** last period

▲ +85%

CLICKS

22

from **13** last period

▲ +69%

AVG. POSITION

26.6

from **34.0** last period

▲ page 3 → page 2

AVG. CTR

2.0%

from **2.2%** last period

– -0.2 pt

What this means: your site was seen **85% more often** in Google (601 → 1,110 times) and earned **more visits** (13 → 22), while your blended average ranking rose from position 34 to 26.6 — the shift from page 3 into page 2 territory. The small dip in click-rate is expected and healthy: when impressions grow faster than clicks, the percentage mechanically softens even though total clicks went up. It is not a drop in performance.

Where your keywords ranked, then and now

Google now shows your site for **~90 search terms** (up from a handful). Below are the terms that matter, with their average position **before** (2–29 July) and **now** (30 July–26 August). Lower number = higher on the page. Most terms improved, a few slipped, and several started ranking for the first time.

SEARCH TERM	BAND	NOW	BEFORE	NOW	MOVE
▲ MOVED UP THE RANKINGS					
conference flags	Page 2		31.6	14.5	▲ 17
I shaped flag	Page 2		29.2	14.3	▲ 15
I shape flags	Page 3		39.9	27.7	▲ 12
I shape flag	Page 2		22.2	11.1	▲ 11
telescopic flag pole supplier uae	Page 7		72.0	61.8	▲ 10
outdoor flags	Page 3		29.0	24.0	▲ 5
telescopic flag pole dubai	Page 6		59.4	54.3	▲ 5
I shape flag pole	Page 1		8.0	4.8	▲ 3
table flag	Page 4		38.7	35.7	▲ 3
telescopic flags	Page 2		12.3	10.6	▲ 2
telescopic flag pole uae	Page 5		49.4	47.3	▲ 2
NEW STARTED RANKING THIS MONTH (NO DATA BEFORE)					
flag printing dubai (head term)	Page 6		—	53.7	New
stadium flags	Page 1		—	5.1	New
wall mounted flag	Page 1		—	7.3	New
I flag	Page 3		—	26.8	New
event flags dubai	Page 6		—	60.0	New
▼ SLIPPED (SHOWN FOR FULL TRANSPARENCY)					
conference flag	Page 1		6.6	9.7	▼ 3
table flags	Page 4		28.8	33.0	▼ 4
retractable flag pole uae	Page 5		41.0	43.6	▼ 3
telescopic flag (~5 impr, noisy)	Page 5		21.5	47.2	▼

Highlights this month: "I shape flag pole" moved onto Page 1 (8.0 → 4.8), and the whole L-shape cluster climbed together — I shaped flag 29.2 → 14.3, I shape flag 22.2 → 11.1, conference

flags 31.6 → 14.5. Your head term "flag printing dubai" started ranking for the first time (position 53.7) — deep, but now on the board, which is the first step of a 4–6 month climb.

HOW TO READ THIS REPORT — THE HONEST FINE PRINT

- **Numbers are still small.** 22 clicks and ~1,110 impressions is a modest base, so big percentages come off small starting points. We show the raw numbers everywhere so nothing looks inflated.
- **Positions are averages, and low-traffic terms wobble.** Most terms get only a handful of impressions a month, so a single search can move a position by several spots. Treat per-keyword positions as a direction, not an exact rank. ("telescopic flag" above is a good example — its drop is almost certainly noise on ~5 impressions.)
- **One month is a short window.** The gains line up with the work done, but a single 28-day period cannot prove cause and effect on its own. SEO compounds over months.
- **"New" means newly visible, not yet a traffic driver.** Terms like flag printing dubai are appearing now but still sit deep on page 5–6; the clicks come as they climb.

TECHNICAL HEALTH

Indexing & site foundation

Indexing is how many of your pages Google has accepted into its search index. More quality pages indexed = more chances to rank.

Pages indexed by Google **41** (was 37)

Not indexed **279**

— of which benign* **~256**

Real thin pages to enrich **~15–20**

*Most "not indexed" URLs are RSS feeds, filter/sort links and system URLs that Google is correct to skip, not broken pages. A one-time cleanup (disable feeds + robots rule) removes most of them next month.

SITE SPEED (MOBILE)

Homepage **99 / 100**

Shop archive **74 / 100**

Product pages **74 / 100**

Homepage is fast; the shop and product templates need a targeted speed fix (scheduled for next month) since that is where buyers actually land.

What we did this month

The foundation phase: fixing credibility issues, telling Google clearly what you sell and where, and building your local presence. This is the groundwork that makes the movement above possible.

TECH FOUNDATION & TRACKING

- ✓ **Search Console + Google Analytics 4** connected and verified; sitemap submitted; baseline logged.
- ✓ Full **technical diagnosis**: classified 140 "not-indexed" URLs, audited filters/canonicals, mapped every keyword to one page.
- ✓ Fixed **broken text** (mojibake) across 23 products, categories and home.
- ✓ Removed leftover **placeholder text** and fixed dead navigation links.
- ✓ **AED 0.00** prices replaced with a clean "Request a quote".

SEO ON-PAGE OPTIMISATION

- ✓ Rewrote **~39 category titles** to "[Product] Dubai | Prime Smart Flags".
- ✓ Added unique, keyworded **alt text to 148 images** (helps image search + accessibility).
- ✓ Added **Organization schema** so Google understands the business entity.
- ✓ Drafted the **pillar page + money landing pages** (ready to publish next month).

LOCAL GOOGLE BUSINESS PROFILE

- ✓ Primary category corrected to **Flag store** (was "Digital printing"); added Sign shop + Digital printing as secondaries.
- ✓ Rewrote the **business description** (keyword-rich, now live).
- ✓ Added **10 services** (flag printing, telescopic poles, teardrop, table, sail, conference, L-shape, car flags and more).
- ✓ **Replied to all 15 customer reviews** individually.
- ✓ Ran a **competitor teardown** of the top Dubai flag printers.

CONTENT ONGOING ENGINE

- ✓ Built a **30-day Google Posts calendar** (12 posts, keyword-targeted).
- ✓ Prepared **7 SEO Q&As** to seed on the profile.
- ✓ Confirmed **social profiles linked** (YouTube, Facebook, Instagram).
- ✓ Speed audit completed; fixes scoped for next month.

Google Business Profile snapshot

4.6 ★★★★★

Google reviews **16**

Reviews replied to **16 / 16**

Verified profile, managed and optimised. Map Pack visibility for local "near me" searches builds over the next 2–3 months.

What happens next month

- 01 Publish the money landing pages** — pillar (/flag-printing-dubai/) plus telescopic pole, table, sail, conference and L-shape pages, each with FAQ & schema. This is the biggest ranking lever.
- 02 Push the near-winners over the line** — I shape flag, telescopic flags and conference flags are all top-of-Page-2; targeted content + internal links to lift them onto Page 1.
- 03 Speed fix on shop & product templates** — bring the 74 scores up, so every product page a buyer lands on loads fast.
- 04 Indexing cleanup** — disable feeds + robots rule to clear the benign "not-indexed" noise, and enrich the ~15 thin product pages.
- 05 Keep the local engine running** — weekly Google Posts, seed the Q&As, and grow reviews toward 20–25.

Data sources: Google Search Console (performance & indexing, property <https://primesmart.ae/>), Google Business Profile, and Google PageSpeed Insights — all pulled live on 28 Aug 2026. Search Console figures compare the last 28 days with the previous 28 days.

Method note: position figures are period averages, not fixed ranks; individual per-keyword positions rest on low impression counts and are directional. Percentage changes are shown with their raw base numbers. Ranking movement coincides with the work performed but cannot be causally attributed on a single 28-day window.
